EPOXY PIPE RSE RESTORES HOME HIT BY PINHOLE LEAKS IN GREENWOOD, SC

The problem:

Marion and Debbi Medlock live in a beautiful home in Greenwood, SC. It was built in 1989. They experienced a pinhole leak that was so small it was hardly detectable. They had been given prices for repiping and an Epoxy Pipe representative came to their home and gave them a free home evaluation. Within weeks another pinhole was found and that's when they decided Epoxy Pipe was right for them. "Not tearing up the house and the Lifetime Warranty was all it took for us to decide." says Marion.

The solution:

The Epoxy Pipe crew arrived at the Medlock's home and began the process by covering the floor with protective matting. The hot and cold water piping systems were both restored in just a day and a half! Mr. Medlock also stated that, "The crew was courteous, professional and very knowledgeable!" Now that the process has been completed they have the peace of mind that their pinhole leaks are gone forever! Epoxy Pipe RSE offers the only permanent solution to pinhole and slab leaks today.

The analysis:

When asked did he expect the project to go so well, Mr. Medlock replied, "Not really, I thought it was a lot more complicated than that but everything went off without a hitch!" "It was Fast, No destruction and with the Lifetime Warranty, I would certainly recommend Epoxy Pipe to my friends and anyone else who is having pinhole leaks." "They went above and beyond our expectations, the house is as clean as the day they arrived, we are very pleased."
